

LAB 7 : Program to map two lists into a dictionary

Program Logic

1. Declare an empty dictionary .
2. Declare two lists.
3. Iterate the for loops to create dictionary.
4. Print the dictionary

Declare dictionary and lists

In [1]:

```
dict = {}  
key_list = ["A", "B", "c", "D", "E"]  
value_list = ["Apple", "Banana", "Cat", "Dog", "Elephant"]
```

In [6]:

```
for i in range(len(key_list)):  
    dict[key_list[i]] = value_list[i]
```

In [7]:

```
print("The Dictionary from the given two list: ")  
print(dict)
```

The Dictionary from the given two list:
{'A': 'Apple', 'B': 'Banana', 'c': 'Cat', 'D': 'Dog', 'E': 'Elephant'}
