TASK2:Program to map one list into dictionary

Program Logic:

1. Define a function to convert list into dictionary
2. using dictionary comprehension
3. Declare list
4. print thre list

In [1]:

```python
def convert(list):
    dictionary={list[i]: list[i+1] for i in range(0,len(list),2)}
    return dictionary
```

In [3]:

```python
list=['A','Apple','B','Bat','C','Cap','D','Dragon','E','Eagle']
print(convert(list))
```

{'A': 'Apple', 'B': 'Bat', 'C': 'Cap', 'D': 'Dragon', 'E': 'Eagle'}
