Write a program to find intersection of 2 lists without using one-line for-loop.

In [14]:

```python
list1=[9,12,7]
list2=[3,12,9]
```

In [15]:

```python
intersection=list()
```

In [17]:

```python
for item in list1:
    if item in list2:
        intersection.append(item)
```

In [19]:

```python
print(intersection)
```

```
[9, 12]
```

In [ ]:
